

2010 Challenge Winners Awarded at the 10th Annual Department of Defense Cyber Crime Center Conference

<http://www.dc3.mil/challenge/2010>

One of the highlights of our plenary session was the award presentation to many of the winners of our 2010 Digital Forensics Challenge. Alan Paller, SANS and Jay Bavisi, EC-Council assisted in the presentations.

In addition to recognition, our U.S. winners the “Williams Twins” from Montana received four days of DCITA Training. Excited to increase digital forensic education, one of the main goals of the DC3 Challenge, the Williams Twins now plan to provide mentorship to high school and undergraduate teams in the area.

Hailing from the University of Texas San Antonio, “Write Blockers” were recognized as the Graduate Winners (sponsored by SANS).

Wilmington University celebrated their second win at this year’s conference in the U.S. Undergraduate Category (sponsored by SANS), with the cleverly named, “Team Name.”

Our high school winner, Ian Wixon (sponsored by SANS) had an opportunity to be introduced to Eric Thompson, Founder and CEO of AccessData who took the time to provide Ian with college and career advice and a mention of an internship possibility.

The winners were also given an opportunity to present their tools, techniques, and methodologies in a breakout session.

U.S. Overall Winning Team “Williams Twins” from Montana

U.S. Graduate Winners "Write Blockers" of University of Texas at San Antonio (SANS)

U.S. Undergraduate Winners "Team Name" from Wilmington University (SANS)

U.S. High School Winner Ian Wixon, sole member of "Crash Override"
from Grafton High School, MA (SANS)
