DoD CYBER CRIME CENTER
Operations Enablement Directorate

Announcing the DC3 **ENHANCED NETWORK SENSOR** and **INTELLIGENT THREAT ENUMERATION (ENSITE)**

- **Real-time Threat Intelligence:** Continuous monitoring of malicious cyber activity targeting the Defense Industrial Base (DIB).

- **AI/ML-powered Detection:** Advanced analytics combining rule-based, signature-based, and behavioral-based models.

- **Alert Scoring & Triage:** Faster validation of alerts linked to network evidence for quick response times.

- **Centralized Dashboard:** Federated view of incidents across the enterprise with real-time traffic inspection.

- **MITRE ATT&CK Framework Integration:** Data normalization and threat mapping to enhance analysis and response.

- **Customized Support:** Tailored installations and dedicated customer service to enhance your cybersecurity posture.

Customized Security Dashboard

Through a FREE security dashboard customized to your company's needs, experience near real-time network monitoring combined with our analysts' expertise, all of which assist in meeting multiple NIST 800-171 Security Objectives.

4-step Enrollment Process for DIB Companies

1. **CONTACT DC3:** To express interest send an email to DC3.ENSITE@us.af.mil.

2. **ONBOARD:** DC3 will arrange for a selected DC3 mission partner to provide a virtual or physical site survey that includes a Technical Questionnaire and Terms of Service agreement.

3. **DEPLOY:** DC3-assigned mission partner will work with assigned DIB company to install a sensor best aligned to support their existing infrastructure.

4. **OPERATE/MONITOR:** In conjunction with DC3 analysts, monitor a customized dashboard of the system for malicious activity.

Whether your networks need physical or virtual deployments, **DC3 ENSITE** has you covered.
Interested? Contact us at **DC3.ENSITE@us.af.mil** to get started.
