CWE-209 INFORMATION EXPOSURE THROUGH AN ERROR MESSAGE ●●●● 20

KNOWLEDGE BYTE

In October 2023, the DoD VDP received multiple submissions demonstrating a condition where unauthorized users could retrieve active session tokens used by Citrix NetScaler. Citrix NetScaler is software used for remote application access and delivery. By creating custom HTTP requests, researchers were able to overflow the memory buffer and access session token information. It is recommended system owners utilizing Citrix NetScaler deploy the latest updated versions. See the following for more information: <https://support.citrix.com/article/CTX579459/netscaler-adc-and-netscaler-gateway-security-bulletin-for-cve20234966-and-cve20234967> & <https://nvd.nist.gov/vuln/detail/CVE-2023-4966> & <https://services.google.com/fh/files/misc/citrix-netscaler-adc-gateway-cve-2023-4966-remediation.pdf>

RESEARCHER OF THE MONTH

👻 Our spooktacular DOD Vulnerability Disclosure Program Researcher of the Month for October is none other than [@reginaldojsf!](#) They've exorcised a wicked remote code execution bug from the Royal Elementor Addons plugin. We're bewitched by their skills! 🌟👾 #Cybersecurity #ResearcheroftheMonth! VDP Hackers for the win!
