CWE- 79 CROSS-SITE SCRIPTING (XSS): 5
CWE-200 INFORMATION DISCLOSURE: 1

KNOWLEDGE BYTE

In June 2025, the DIB-VDP received numerous submissions detailing a cross-site scripting vulnerability within specific versions of Palo Alto PAN-OS GlobalProtect. GlobalProtect is a remote access application and VPN solution. Researchers identified a potential for JavaScript code execution within the GlobalProtect web gateway through the use of specially crafted links. Activation of the crafted link by an authenticated browser may lead to phishing attacks or credential theft in specific configurations. It is recommended that all system owners utilizing GlobalProtect update to the latest applicable version of PAN-OS.

Further information is available in the following resources:

<https://security.paloaltonetworks.com/CVE-2025-0133>

<https://portswigger.net/web-security/cross-site-scripting/reflected>

<https://xbow.com/blog/xbow-globalprotect-xss>

RESEARCHER OF THE MONTH

Huge thanks to [@hipdead010](#) for responsibly disclosing a reflected XSS vulnerability via /ssl-vpn/getconfig.jsp on a GlobalProtect VPN portal. A sharp reminder of how overlooked endpoints can pose real risks! #DIBVDP #CyberSecurity #InfoSec #WebSecurity #EthicalHacking
