

DoD CYBER CRIME CENTER

Cyber Training Academy

INTERNATIONAL CYBER FORENSICS COURSE (ICFC)

Cyber Forensics Training for Foreign Partners

INCREASE YOUR PROFICIENCY:

Foreign partners interested in advancing digital forensics skills have the unique opportunity to receive tailored training at the DC3 Cyber Training Academy. In the seven-week hands-on course, latest technologies in digital forensics and cybersecurity are learned. The skills gained are instrumental in defending a country's assets against endless cyberattacks.

TECHNICAL SKILLS

INSTRUCTION

CAREER-FOCUSED

RECOMMENDED SKILLS:

Candidates should possess relevant computer and technical skills, an understanding of how a computer network functions (including network protocols, topologies and more) and a working knowledge of various operating systems to navigate and uncover information on a variety of platforms. Basic familiarity with different programming languages and industry standard forensics tools will prove advantageous during the course.

COURSE OUTCOMES:

- Learn to implement basic computer and network security through lecture and hands-on activities
- Demonstrate how to handle digital media effectively when responding to an incident by applying industry standard processes and procedures
- Conduct a forensic examination of an image of the Windows operating system using different types of computer forensics tools
- Demonstrate and explain how to conduct a lawful network investigation

COURSE DETAILS

International Cyber Forensics Course (ICFC)
- MASL D179205

Delivery:
In Residence,
Mobile Training Team (MTT)

Duration:
280 hours over 7 weeks

WEEK 1

Introduction to Networks
and Computer Hardware (INCH)

WEEK 2-3

Cyber Incident Response
Course (CIRC)

WEEK 4-5

Windows Forensic
Examinations (WFE)

WEEKS 6-7

Forensics and Intrusions
in a Windows Environment (FIWE)

COURSE DATES

July 14, 2025–August 29, 2025

July 13, 2026–August 28, 2026

July 12, 2027–August 27, 2027
