A FEDERAL CYBER CENTER

FORENSIC LAB SERVICES

DoD Center of Excellence for Digital and Multimedia (D/MM) forensics. DC3 Cyber Forensics Lab is an ISO 17025 accredited lab that performs D/MM forensic examinations, device repair, data extraction, and expert testimony for DoD.

- Network Intrusions
- Malware/Reverse Engineering
- Enhancing Video and Voice Recordings
- Aircraft Mishap Data Recovery
- Damaged Media and Submerged Devices
- Mobile Device Encryption/Recovery
- DOMEX Forensic Partner

CYBER TRAINING

Provides specialized in-residence and online cyber training (**www.dcita.edu**).

- Cyber Protection Team Training
- Network Defense
- International Partner Training
- Basic and Advanced Forensic Examination
- Distance Learning/Webinar/Mobile Training
- Digital Forensics Certifications

INFORMATION TECHNOLOGY

Tailored software and system solutions to support digital forensic examiners, DOMEX, and cyber intrusion analysis.

- Tool and Software Development
- Tool Test/Validation
- Counterintelligence Tool Repository
- Automated Malware Processing

MISSION STATEMENT

A Federal Cyber Center that delivers innovative capabilities and expertise to enable and inform law enforcement, cybersecurity, and national security partners

Forensic Lab Services · Vulnerability Disclosure · DIB Cybersecurity · Operations Enablement · Information Technology · Cyber Training · DoD Cyber Crime Center

VISION STATEMENT

Enable insight and action in cyberspace and beyond

VULNERABILITY MANAGEMENT

DoD Vulnerability Disclosure Program includes collaborative efforts with private-sector cybersecurity researchers to crowdsource the identification of vulnerabilities on DoD networks and systems.

- Enhance Security of DoD Networks/Systems
- Independent Assessment of Cyber Defenses
- Improve Mission Assurance

DEFENSE INDUSTRY SHARING

DoD focal point for all cyber incident reporting affecting unclassified networks of Defense Industrial Base (DIB) contractors.

- Cyber Threat Information Sharing with DIB
- Cyber Incident and Malware Analysis
- Pilot Service Offerings (CSaaS)
- Mitigation and Remediation Strategies
- Partnership Exchanges

OPERATIONS ENABLEMENT

Amplifies the collective effects of DoD-wide law enforcement and counterintelligence investigations and operations by conducting expert technical analysis and all-source analysis and developing enhanced operational support capabilities.

- Collaborative Analytics with LE/CI/IC
- Focused All Source Intelligence
- Tailored Operational Production
- Real-time Threat Intel via AI
