A FEDERAL CYBER CENTER

DC3 Capabilities for DoD Requirements

Forensic Lab Services

DoD Center of Excellence for Digital and Multimedia (D/MM) forensics. DC3 Cyber Forensics Lab is an ISO 17025 accredited lab that performs D/MM forensic examinations, device repair, data extraction, and expert testimony for DoD.

- Network Intrusions
- Malware/Reverse Engineering
- Enhancing Video and Voice Recordings
- Aircraft Mishap Data Recovery
- Damaged Media and Submerged Devices
- Mobile Device Encryption/Recovery
- DOMEX Forensic Partner

Defense Industry Sharing

DoD Focal point for all cyber incident reporting affecting unclassified networks of Defense Industrial Base (DIB) contractors.

- Cyber Threat Information Sharing with DIB
- Cyber Incident and Malware Analysis
- Mitigation and Remediation Strategies
- Partnership Exchanges
- Cyber Resiliency Reviews

Vulnerability Management

DoD Vulnerability Disclosure Program Lead. Includes collaborative efforts with private-sector cybersecurity researchers to crowdsource the identification of vulnerabilities on DoD networks and systems.

- Enhance Security of DoD Networks/Systems
- Independent Assessment of Cyber Defenses
- Improve Mission Assurance

Mission Statement

Deliver superior digital and multimedia forensic lab services, cyber technical training, vulnerability sharing, technical solutions development, and cyber analysis within the following DoD mission areas: cybersecurity and critical infrastructure protection, law enforcement and counterintelligence, document and media exploitation, and counterterrorism.

Vision Statement

Digital and multimedia technical and analytical center of excellence to improve DoD mission assurance and enhance warfighter capability.
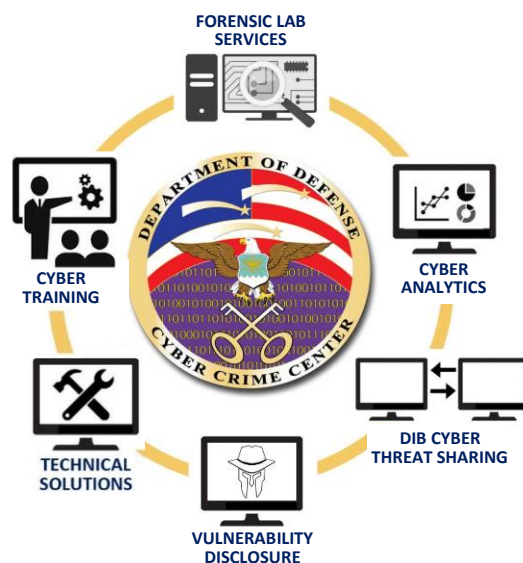

Cyber Analytics

Forensically enabled cyber analytical support to law enforcement (LE), counterintelligence (CI), and intelligence community (IC). DC3 Analytical Group synthesizes adversary intrusion-related activities to aid in support of intrusion incidents, investigations, and operations.

- Collaborative Analytics with LE/CI/IC
- Actionable Threat Pictures
- Intelligence Information Reports
- Cyber Persona Profiles
- Focused Cyber Analysis

Cyber Training

Provides specialized in-residence and online cyber training (DCITA.edu).

- Cyber Protection Team Training
- Network Intrusion Fundamentals
- Digital Forensics Certifications
- Basic and Advanced Forensic Examination
- Online Undercover Techniques
- Distance Learning/Webinar/Mobile Training

Technical Solutions

Tailored software and system solutions to support digital forensic examiners, DOMEX, and cyber intrusion analysis.

- Tool and Software Development
- Tool Test/Validation (Including GOTS/COTS)
- Counterintelligence Tool Repository
- Automated Malware Processing
